Student Comments:

- Thomas has been my favorite TA I've had. He was super helpful, nice, funny, and smart. He knew tricks and was also understanding with problems that were challenging. He would help us solve any problems we had.

36

What did your TA do that you found particularly helpful?

(Instructor Text/Memo)

Department Question

Thomas Yahl Teaching Assistant

- He did a great test review before exams. He also provided clear examples of problems that I found easier to learn from.
- Answered each question people had and did not rush through things.
- He explained things very clearly and was very helpful in answering questions
- he was very helpful and didn't make us feel bad for asking questions whether simple or not (which should be the bare minimum but sometimes it isn't like that).
- The lab help files were incredible. I know those took extra work from him but he still did it to help us out. He made things seem simpler than they have been before.
- Providing useful hints for the coding process
- Thomas was always more than willing to help each student individually and answer any and all questions.
- Thomas had a way of creating an open learning environment that felt welcoming and effective. He was always open to answer questions and took time out of his own day to prepare material to assist us with the weekly labs. He would send out an explanation of each lab the night before we would meet for class, which is just going above and beyond. Thomas was also very clear and was amazing at explaining math.
- He created 'review' type sessions that went over all of the concepts from the units/year that really helped me know what I needed to relook at and study again.
- He made sure to carefully work through each problem and did a good job navigating both online and in-person classes
- just super helpful and nice!
- Explained material clearly.
